Artize

Total water control, at your finger tips.
Available now.

I-TAP

Our new digital touchpad with flow and temperature control.

LUXELET

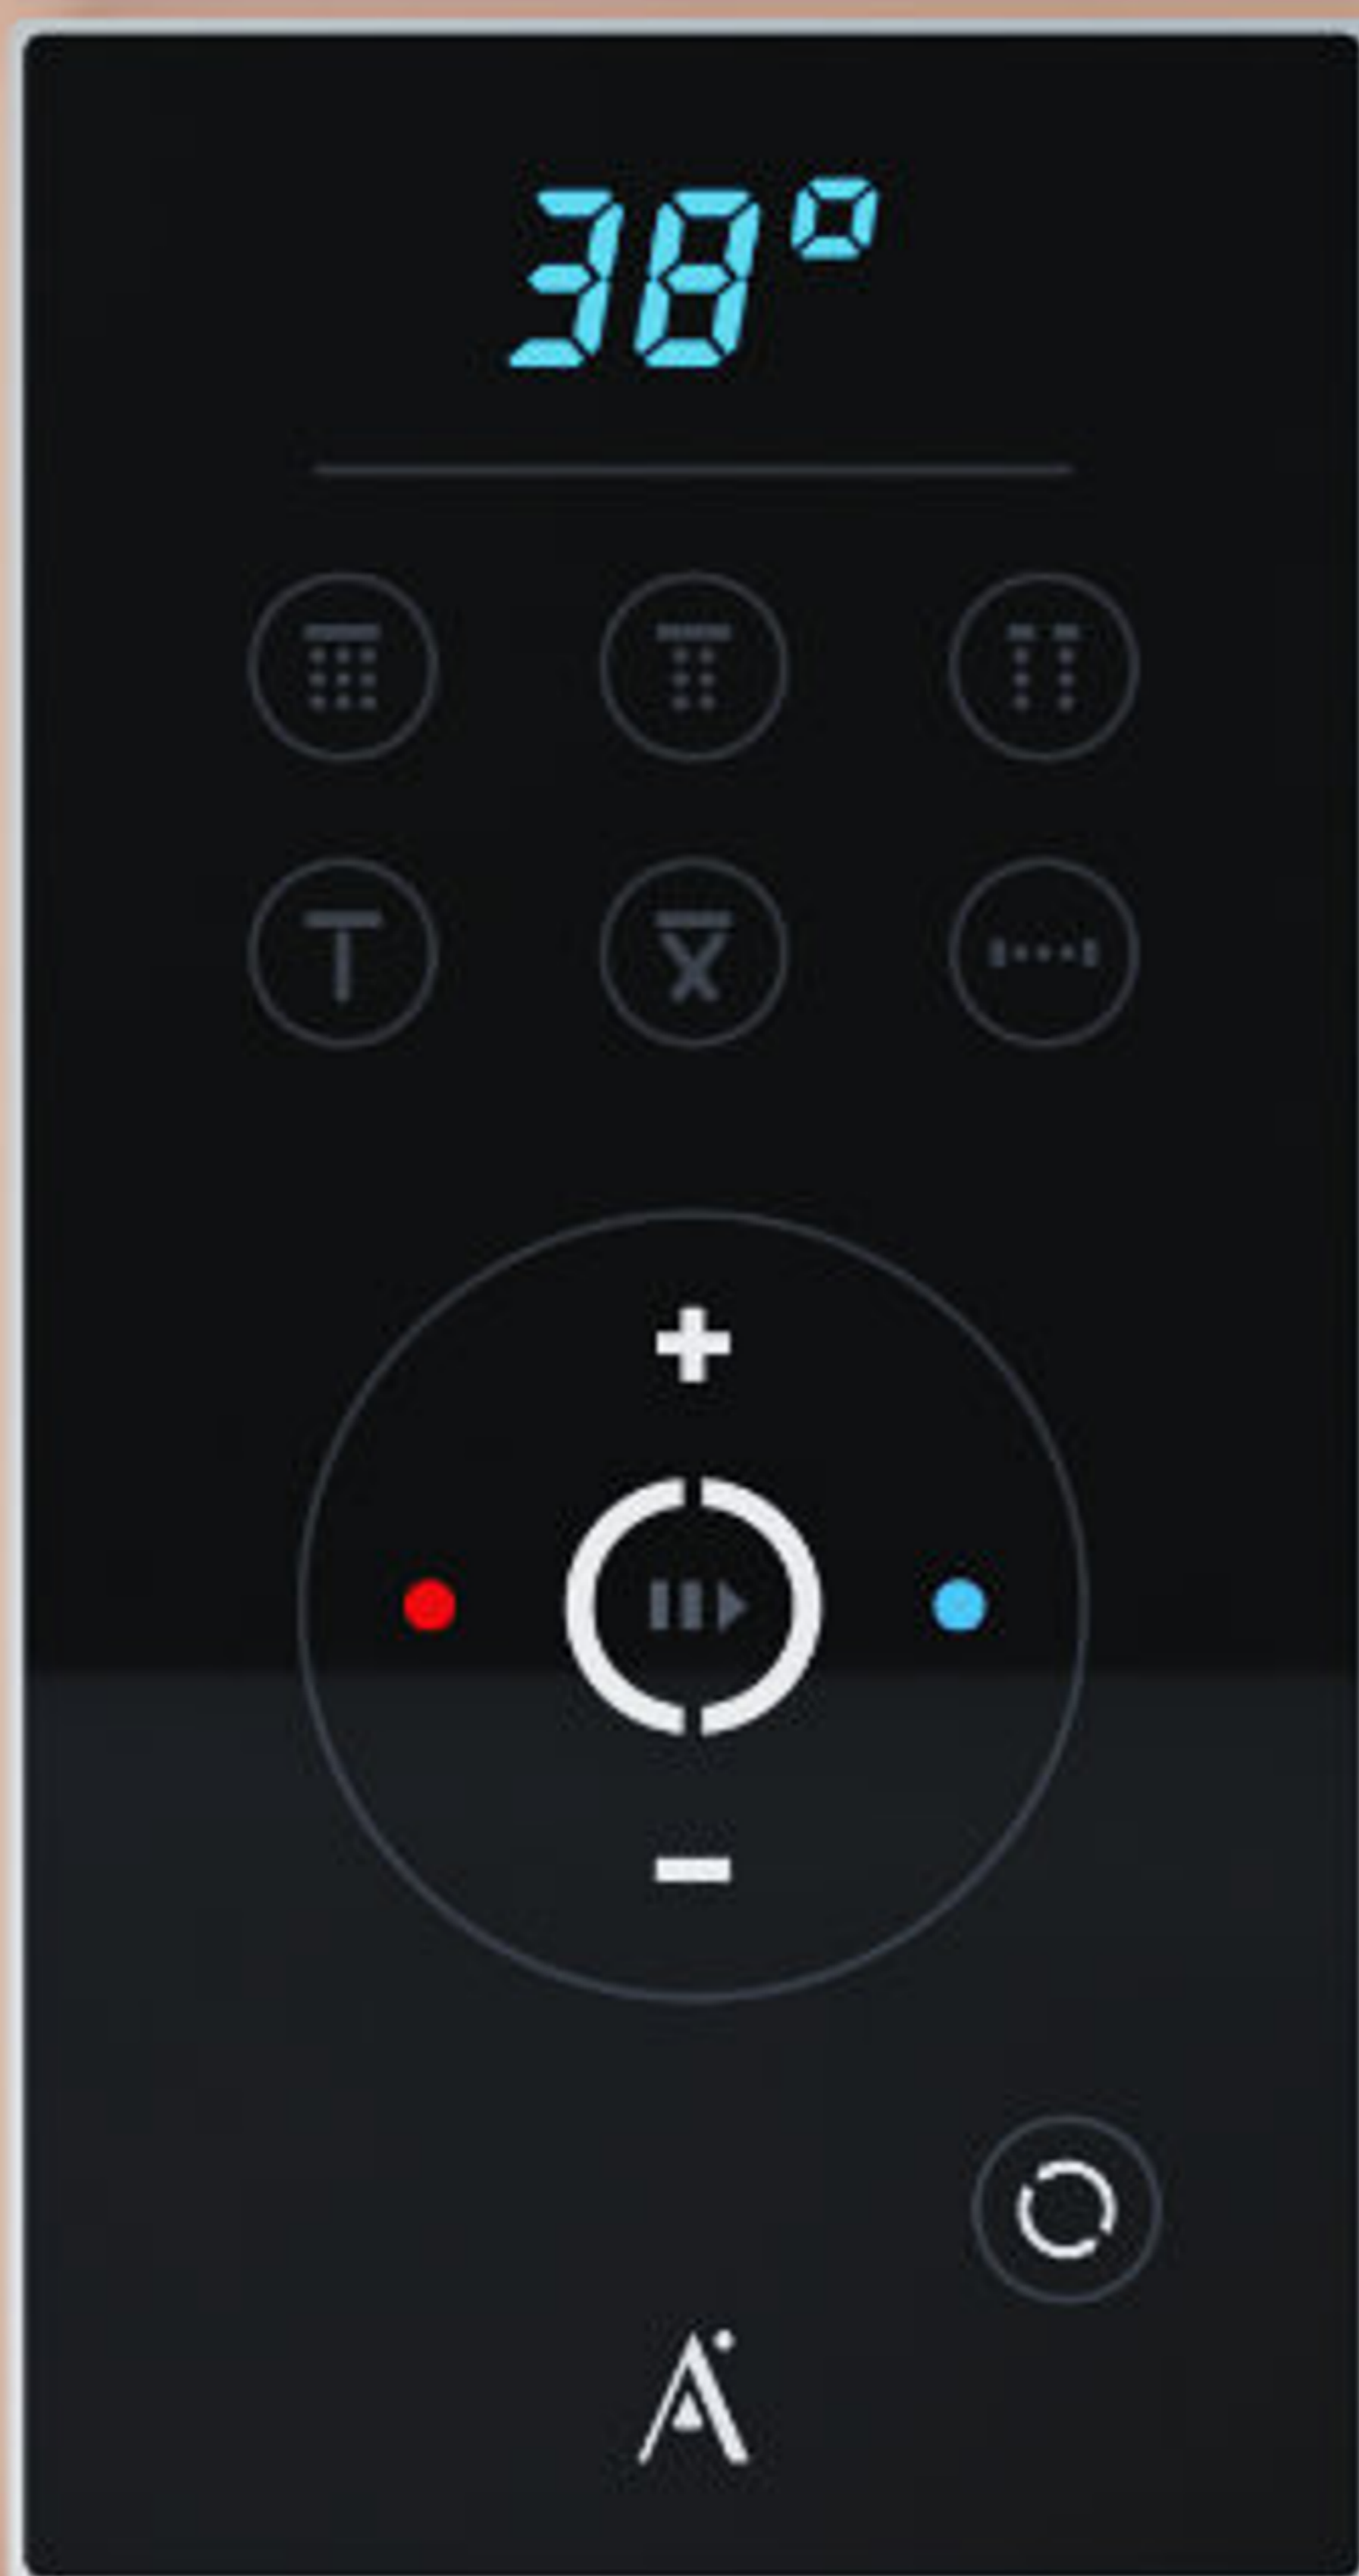

Our most advanced luxury electronic water closet.
An experience to change your perception of bathrooms.

SHOWERTRONIC iV6
Control 6 independent water outlets
for the ultimate showering experience.

SHOWERTRONIC iV6

FROM TOUCH TO PLEASURE

Artize Showertronic iV6 is an intelligent water mixer system, which automatically maintains the water temperature and flow rate during showering. At the touch of a fingertip on the high-durability, waterproof touchpad, you can choose your shower mode, control the temperature, and manage water flow.

ONE TO RULE THEM ALL

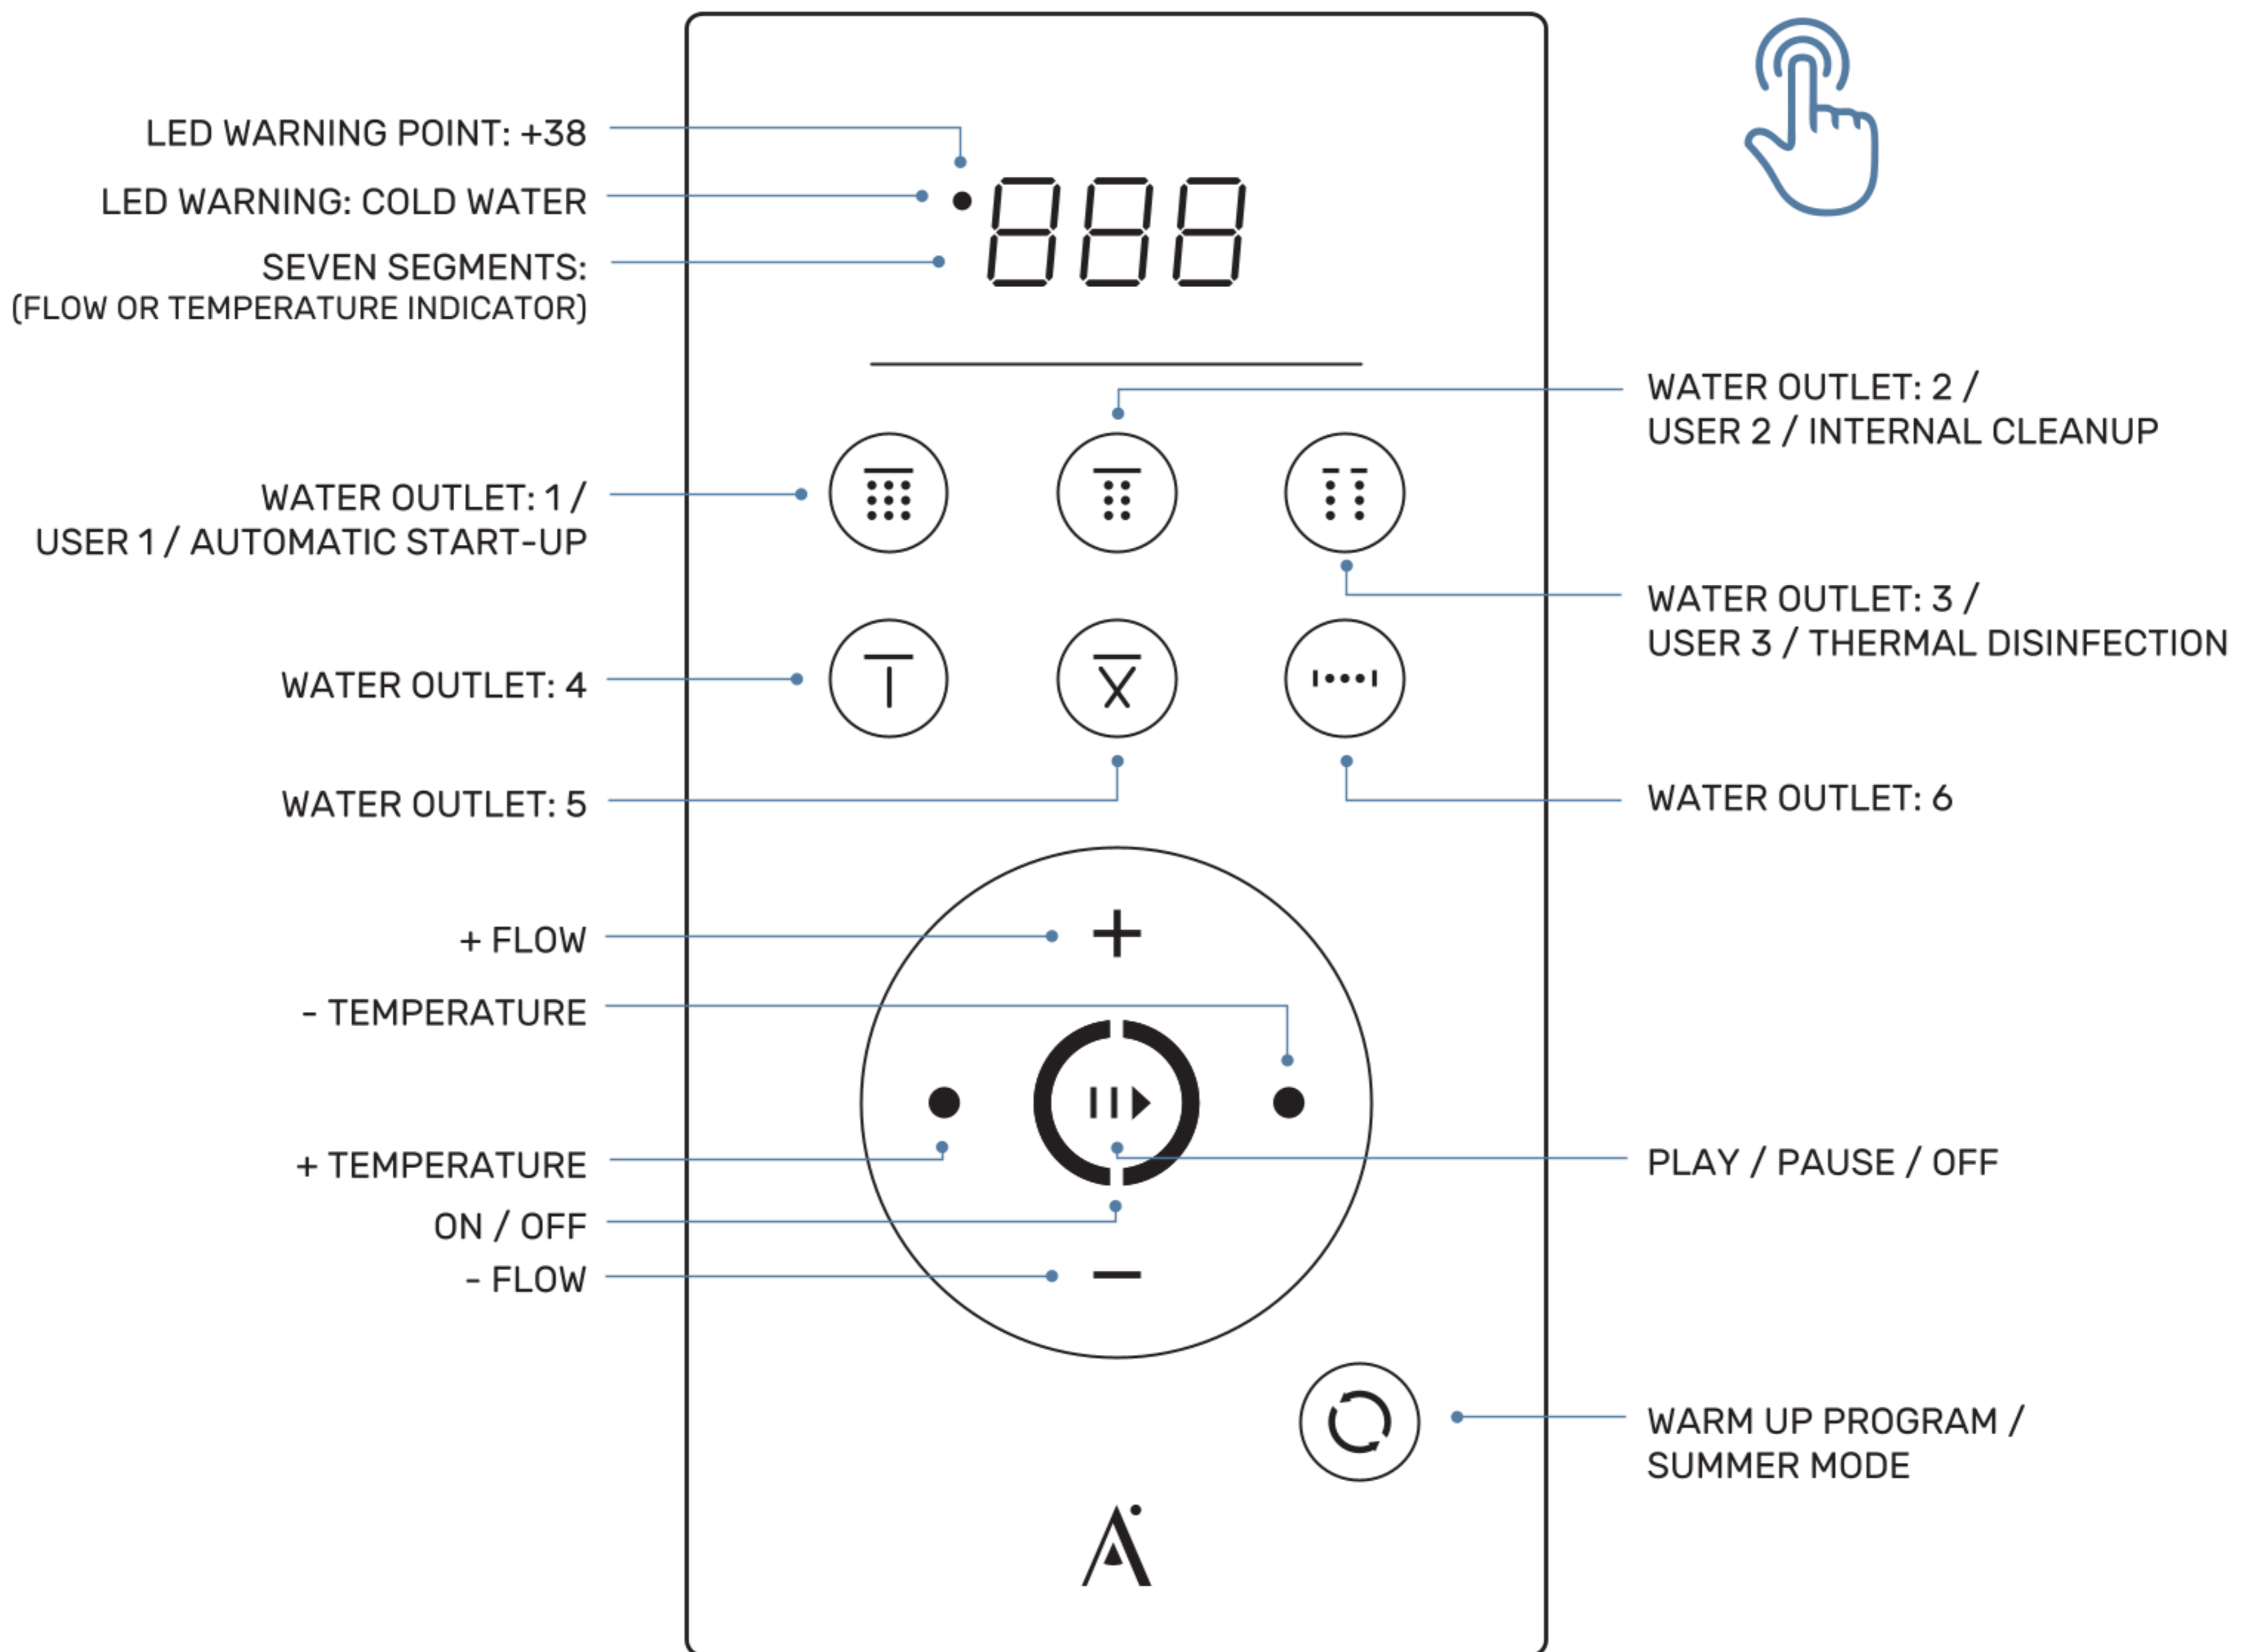

The next showering experience

How does Artize Showertronic iV6 do a better, more precise, more reliable job of giving you water at the temperature you desire? The answer is in the advanced technology that lies behind the beautiful, simple, waterproof touchpad interface - a perfect balance between functional simplicity and technical complexity. Showertronic iV6's innovative electronic thermostatic mixing system has 6 electronic valves, and multiple sensors. These are connected to a state-of-the-art intelligent control software managing all showering operations.

Main features are:

- Warm up mode: preheats the shower for you by flushing out cold water until the desired preset temperature is reached.
- Automatic startup: the system can automatically set itself up after installation by determining and activating the outlets connected and their maximum flow rates.
- No risk of scalding: the water temperature is kept constant with no surprising hot water shocks even if somebody opens a faucet elsewhere in the house.
- Rock-steady water flow: Showertronic iV6 is a flow-static mixer as well. Its 6 intelligent valves, sensors and software maintain the water's flow perfectly steady at the flow rate you choose.
- Pause mode: perfect for when you're soaping or shampooing, it maintains the exact temperature and flow rate of the shower when you restart it.
- Automatic internal clean-up: ensures hygiene in the system with water-shock flushing from all outlets to remove lime and impurities from the pipes and outlets.
- Memory settings: store up to 3 preferred settings in its memory, including the water outlet of your choice, the flow rate, and of course, the temperature
- Thermal disinfection: this feature flushes hot water through all outlets for 5 minutes - at the maximum temperature available in the water heater.
- Display of Water Consumption: While taking a shower, when in pause mode, the display shows the water consumed.
- Summer Mode: when water heater is switched off, it allows the system to operate without hot water and offer better water flow.
- Alarm Display: automatic identification and display of system problems

SHOWERTRONIC IV6 MULTI-FUNCTIONAL TOUCH PANEL

SMART BATHROOM

RAINJOY SHOWERHEAD

The queen of SPA shower heads: rain, intense rain, 6x mist effects, waterfall and chromotherapy. All in one product.

HAND SHOWER

Maze Hand Shower 65X95mm, rectangular shape, single flow with Rubit Cleaning System.

SHOWERTRONIC iV6

The master. From here you can control all the functions of your shower set. With one finger.

BODY JETS

Tilting Square Bodytile 135X135mm, in-wall installation. Perfect for a full body water massage.

SMART BATHROOM

NO CARTRIDGES

No small electric motors or other similar parts that need to be recalibrated or replaced. iV6 runs on intelligent software.

HANDLES DIFFERENTIAL PRESSURE

Even up to 5 bar, between hot and cold water inputs.

HIGH PRECISION SENSORS

To check water flow rate and temperature every 50 milliseconds for instant control and cut off, if required.

SAFETY

Low voltage (12V DC) compliance for wet areas.

DURABILITY

Great for continuous use thanks to the absence of friction, IP54 components, and piezo-electric technology.

Technology that makes the difference.

For delivering water at the desired flow rate and temperature, Artize Showertronic iV6 offers several key advantages over other systems - advantages that come from being an Intelligent Valve Sensor System.

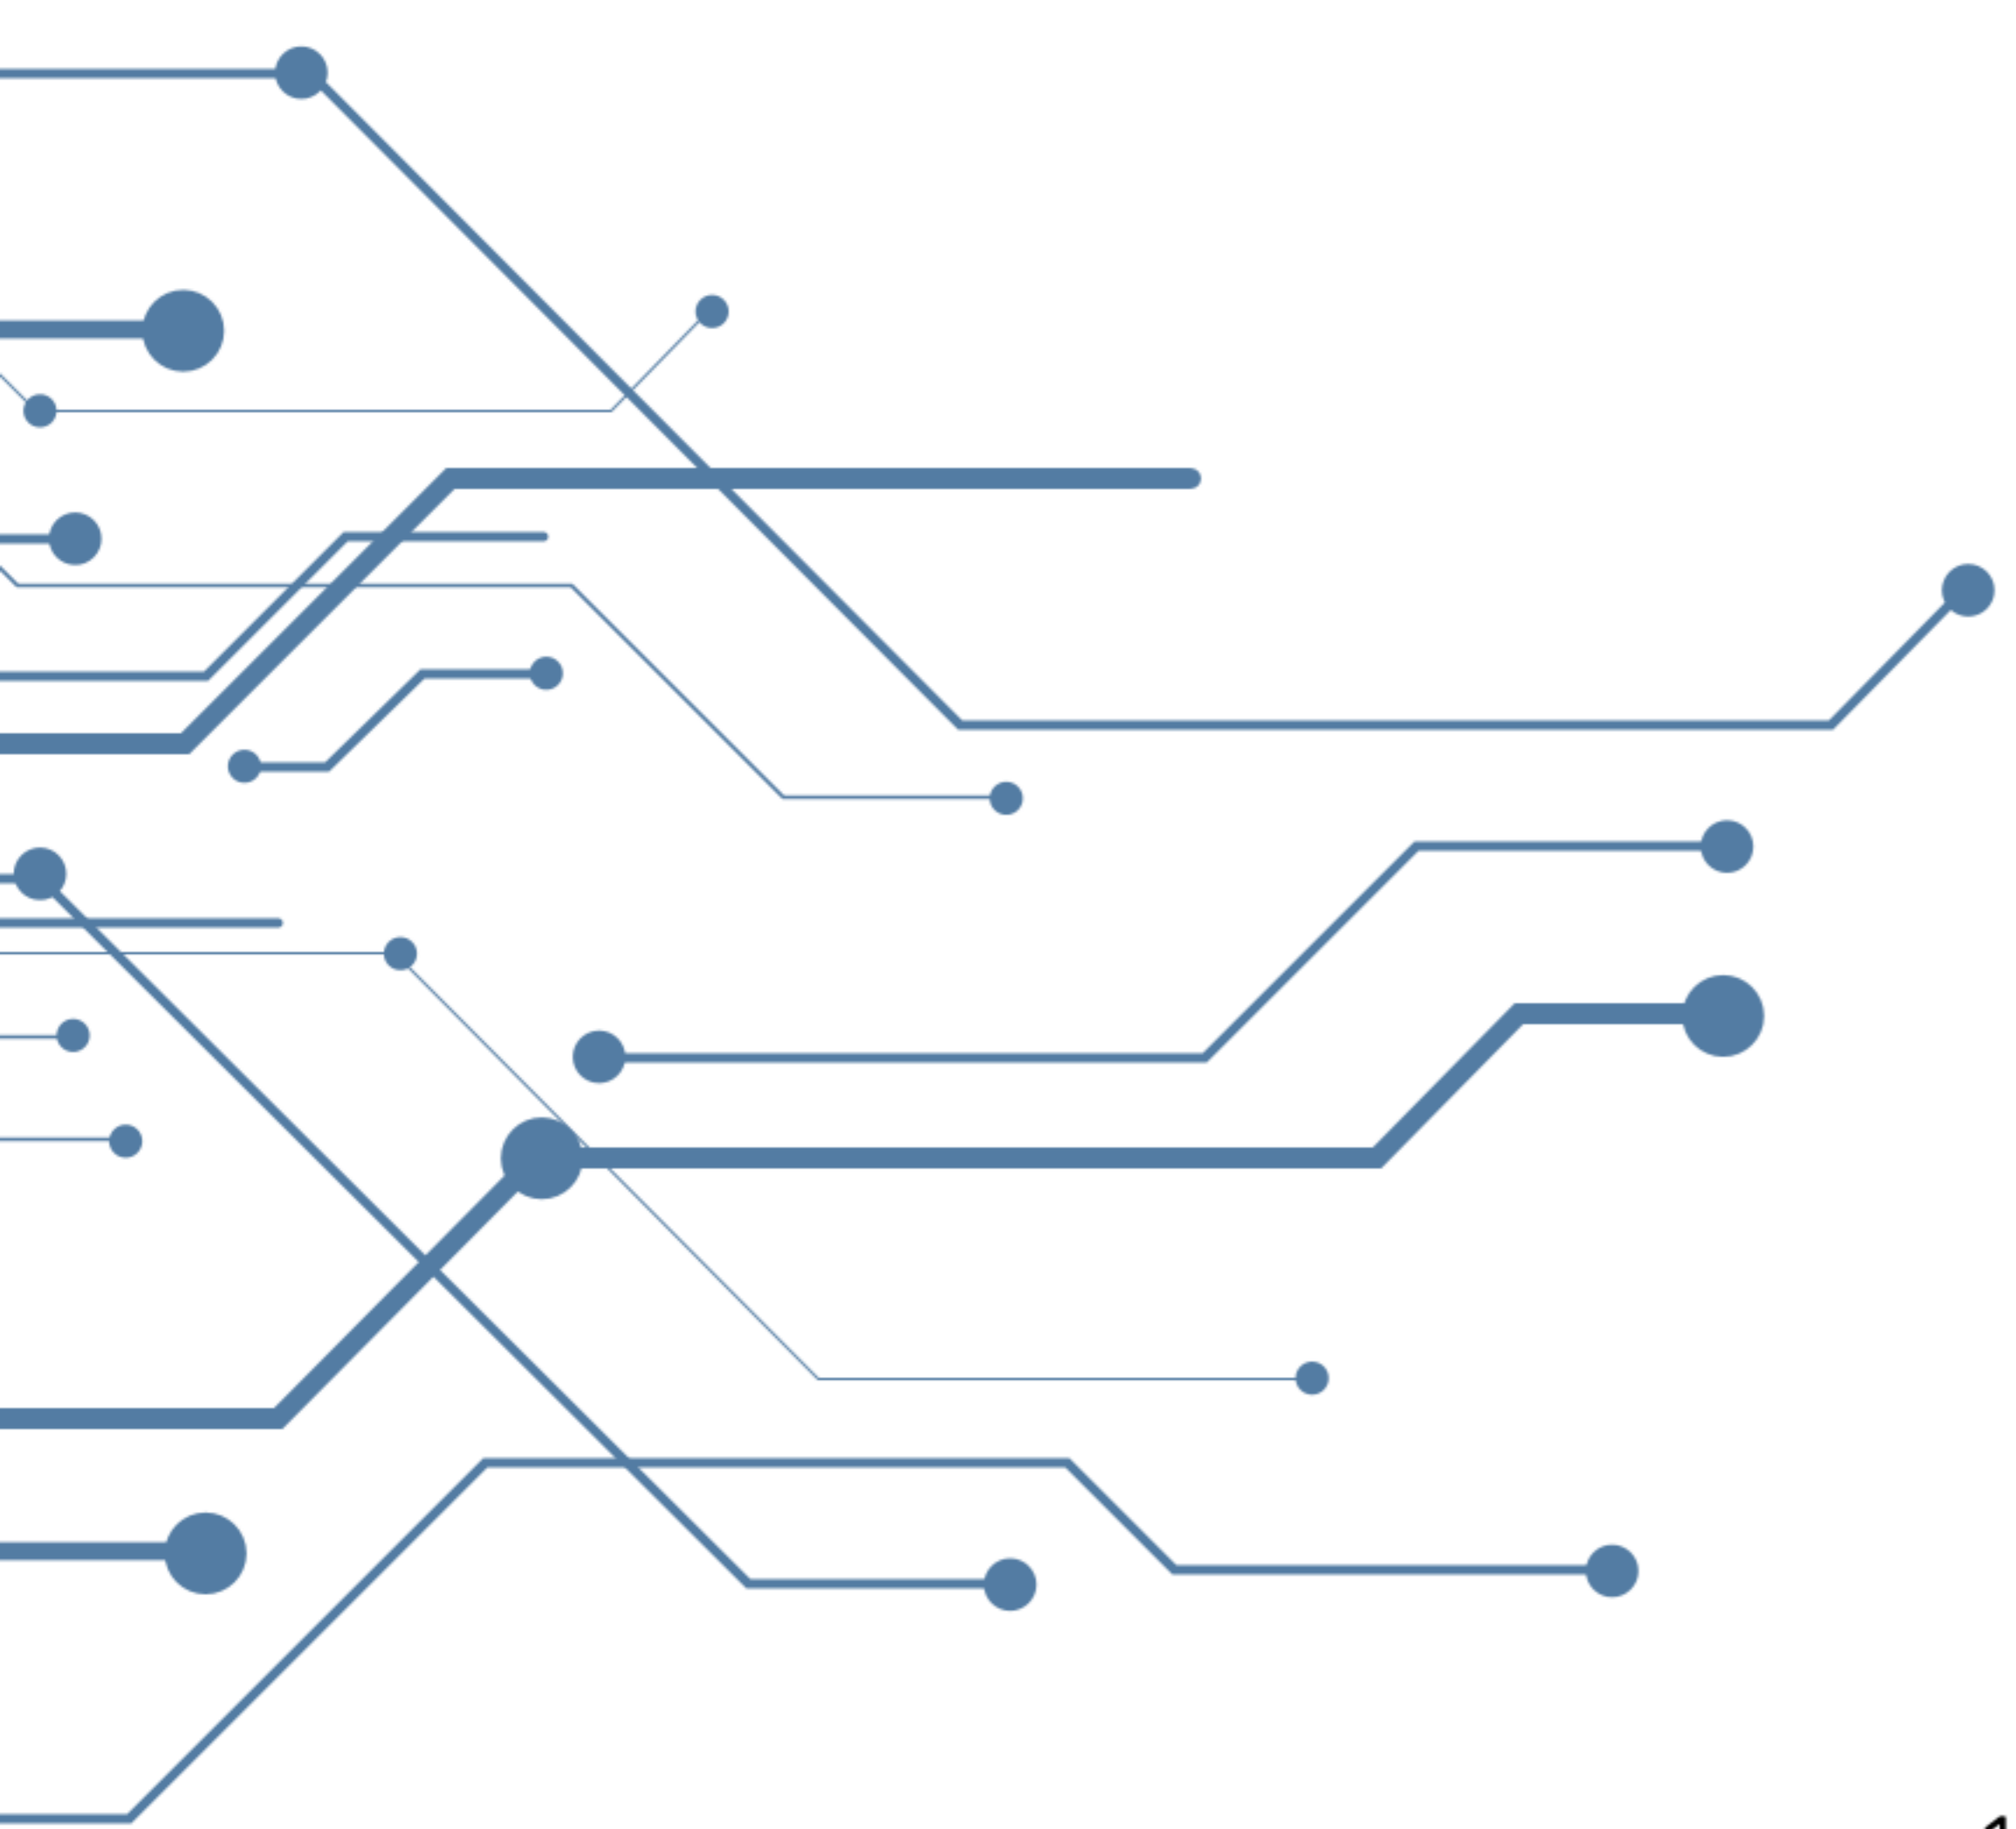

Showertronic iV6 also has its own battery back up to give you uninterrupted showering luxury in case of power failures.

ELECTRONIC LUXURY

Bring your bathroom experience to a new level

Luxelet is an innovative offering in ceramics. Made possible by the coming together of a deep understanding of functional design, modern electronics technology and advanced manufacturing expertise in ceramics. It fulfills the need for sensory intelligence that today's world demands. Upgrading the daily experience of the bathroom to a whole new level of comfort, hygiene and ease.

For too long the world has allowed ceramics to exist without leaping forward to a new level of functionality. Luxelet by Artize is a product that alters your perception of what's possible in bathroom ceramics - when they are imbued with user-sensitive features and benefits, created with an understanding of interface design offering hygiene, convenience and sense.

LUXELET

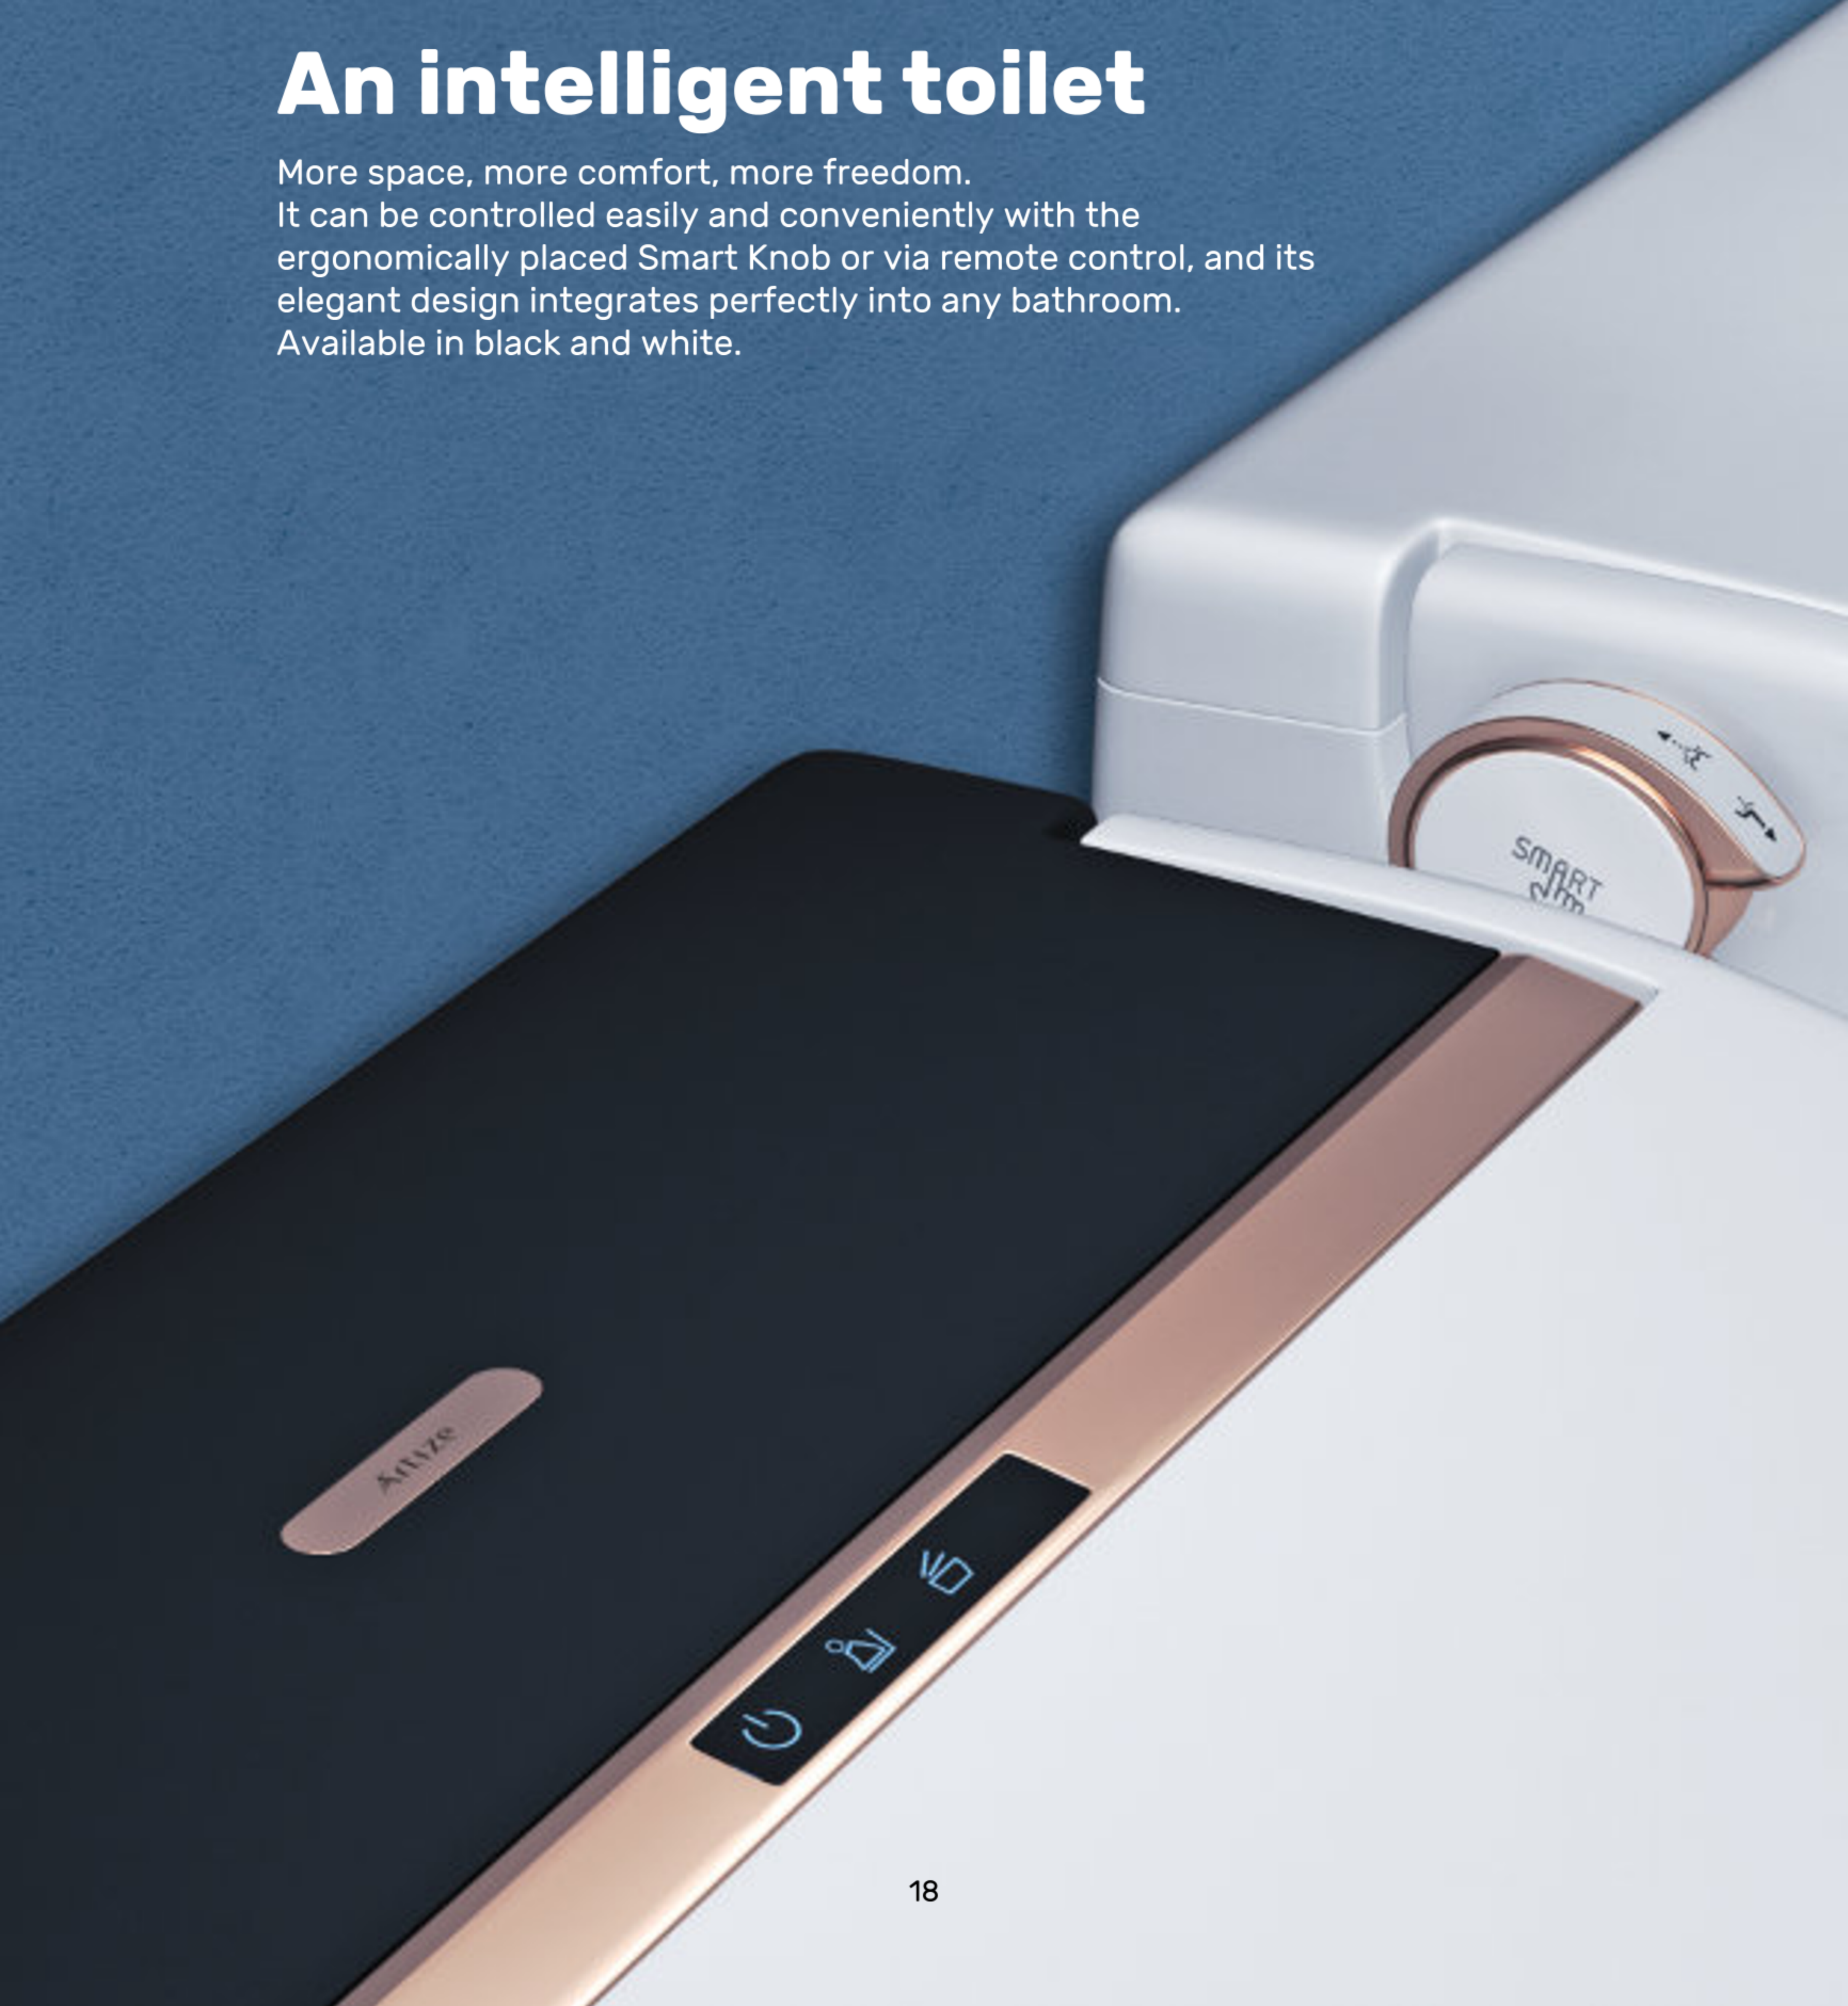

CONVENIENCE AND SENSE

Artize's Luxelet brings together an array of features that deliver unprecedented levels of hygiene, comfort and convenience. Experience some of these to know why you'll never be able to go back to other toilets ever again.

An intelligent toilet

More space, more comfort, more freedom.
It can be controlled easily and conveniently with the ergonomically placed Smart Knob or via remote control, and its elegant design integrates perfectly into any bathroom.
Available in black and white.

SMART BATHROOM

REMOTE CONTROL

- instant warm water
- manual nozzle position
- on-board operation
 - night light
- microwave sensor opening

SMART BATHROOM

SEAT COVER TEMPERATURE CONTROL

Adjust the seat temperature to your liking

AUTO FLUSH

Automatic flushing ensures the bathroom stays fresh

ANTI-BACTERIAL CLEAN GLAZE

A surface that prevents the growth of germs and is easy to clean too

HANDS-FREE BIDET

Oscillating nozzle with adjustable position, and multiple washing options

DRYER

Warm air drying for convenience, comfort and complete hygiene

DEODORISATION

The automatic deodoriser removes odours and keeps the bathroom fresh

SMART BATHROOM

LED NIGHT LIGHT

At night, the built in light automatically switches on when sensing your presence.

THE FUTURE OF TAPS

Your new digital touch mixer

What if your tap was actually your personal hand-washing assistant? With I-TAP, you can control not only the temperature and flow of water, but also monitor water usage and save energy all while getting a stream that's right for every task. Revolutionize the way you wash your hands using one simple, intuitive touch panel.

Designed to be easy to operate, this user-friendly system is suitable for both domestic and professional use. I-TAP is extremely versatile, it offers great design choices and it is easy to install. You can choose between basin, deck and wall mount to suit your washroom design.

EASY

The I-TAP system is developed to be integrated into any type of washbasin in combination with an electronic CPU capable of digital reading and accurate thermostatic regulation of water temperature and flow rate.

I-TAP

SMART BATHROOM

A better way to wash your hands

The I-TAP is a ground breaking digital tap system that separates the temperature and flow of water with one simple touch.

This means the temperature you choose is the temperature you get, saving both water and energy.

DECK MOUNTED

Developed to be integrated into any type of washbasin counter in combination with its CPU device. Easy to reach by all age groups.

SMART BATHROOM

TALL BOY

The I-TAP system essential design allows for all types of basin configurations.

SMART BATHROOM

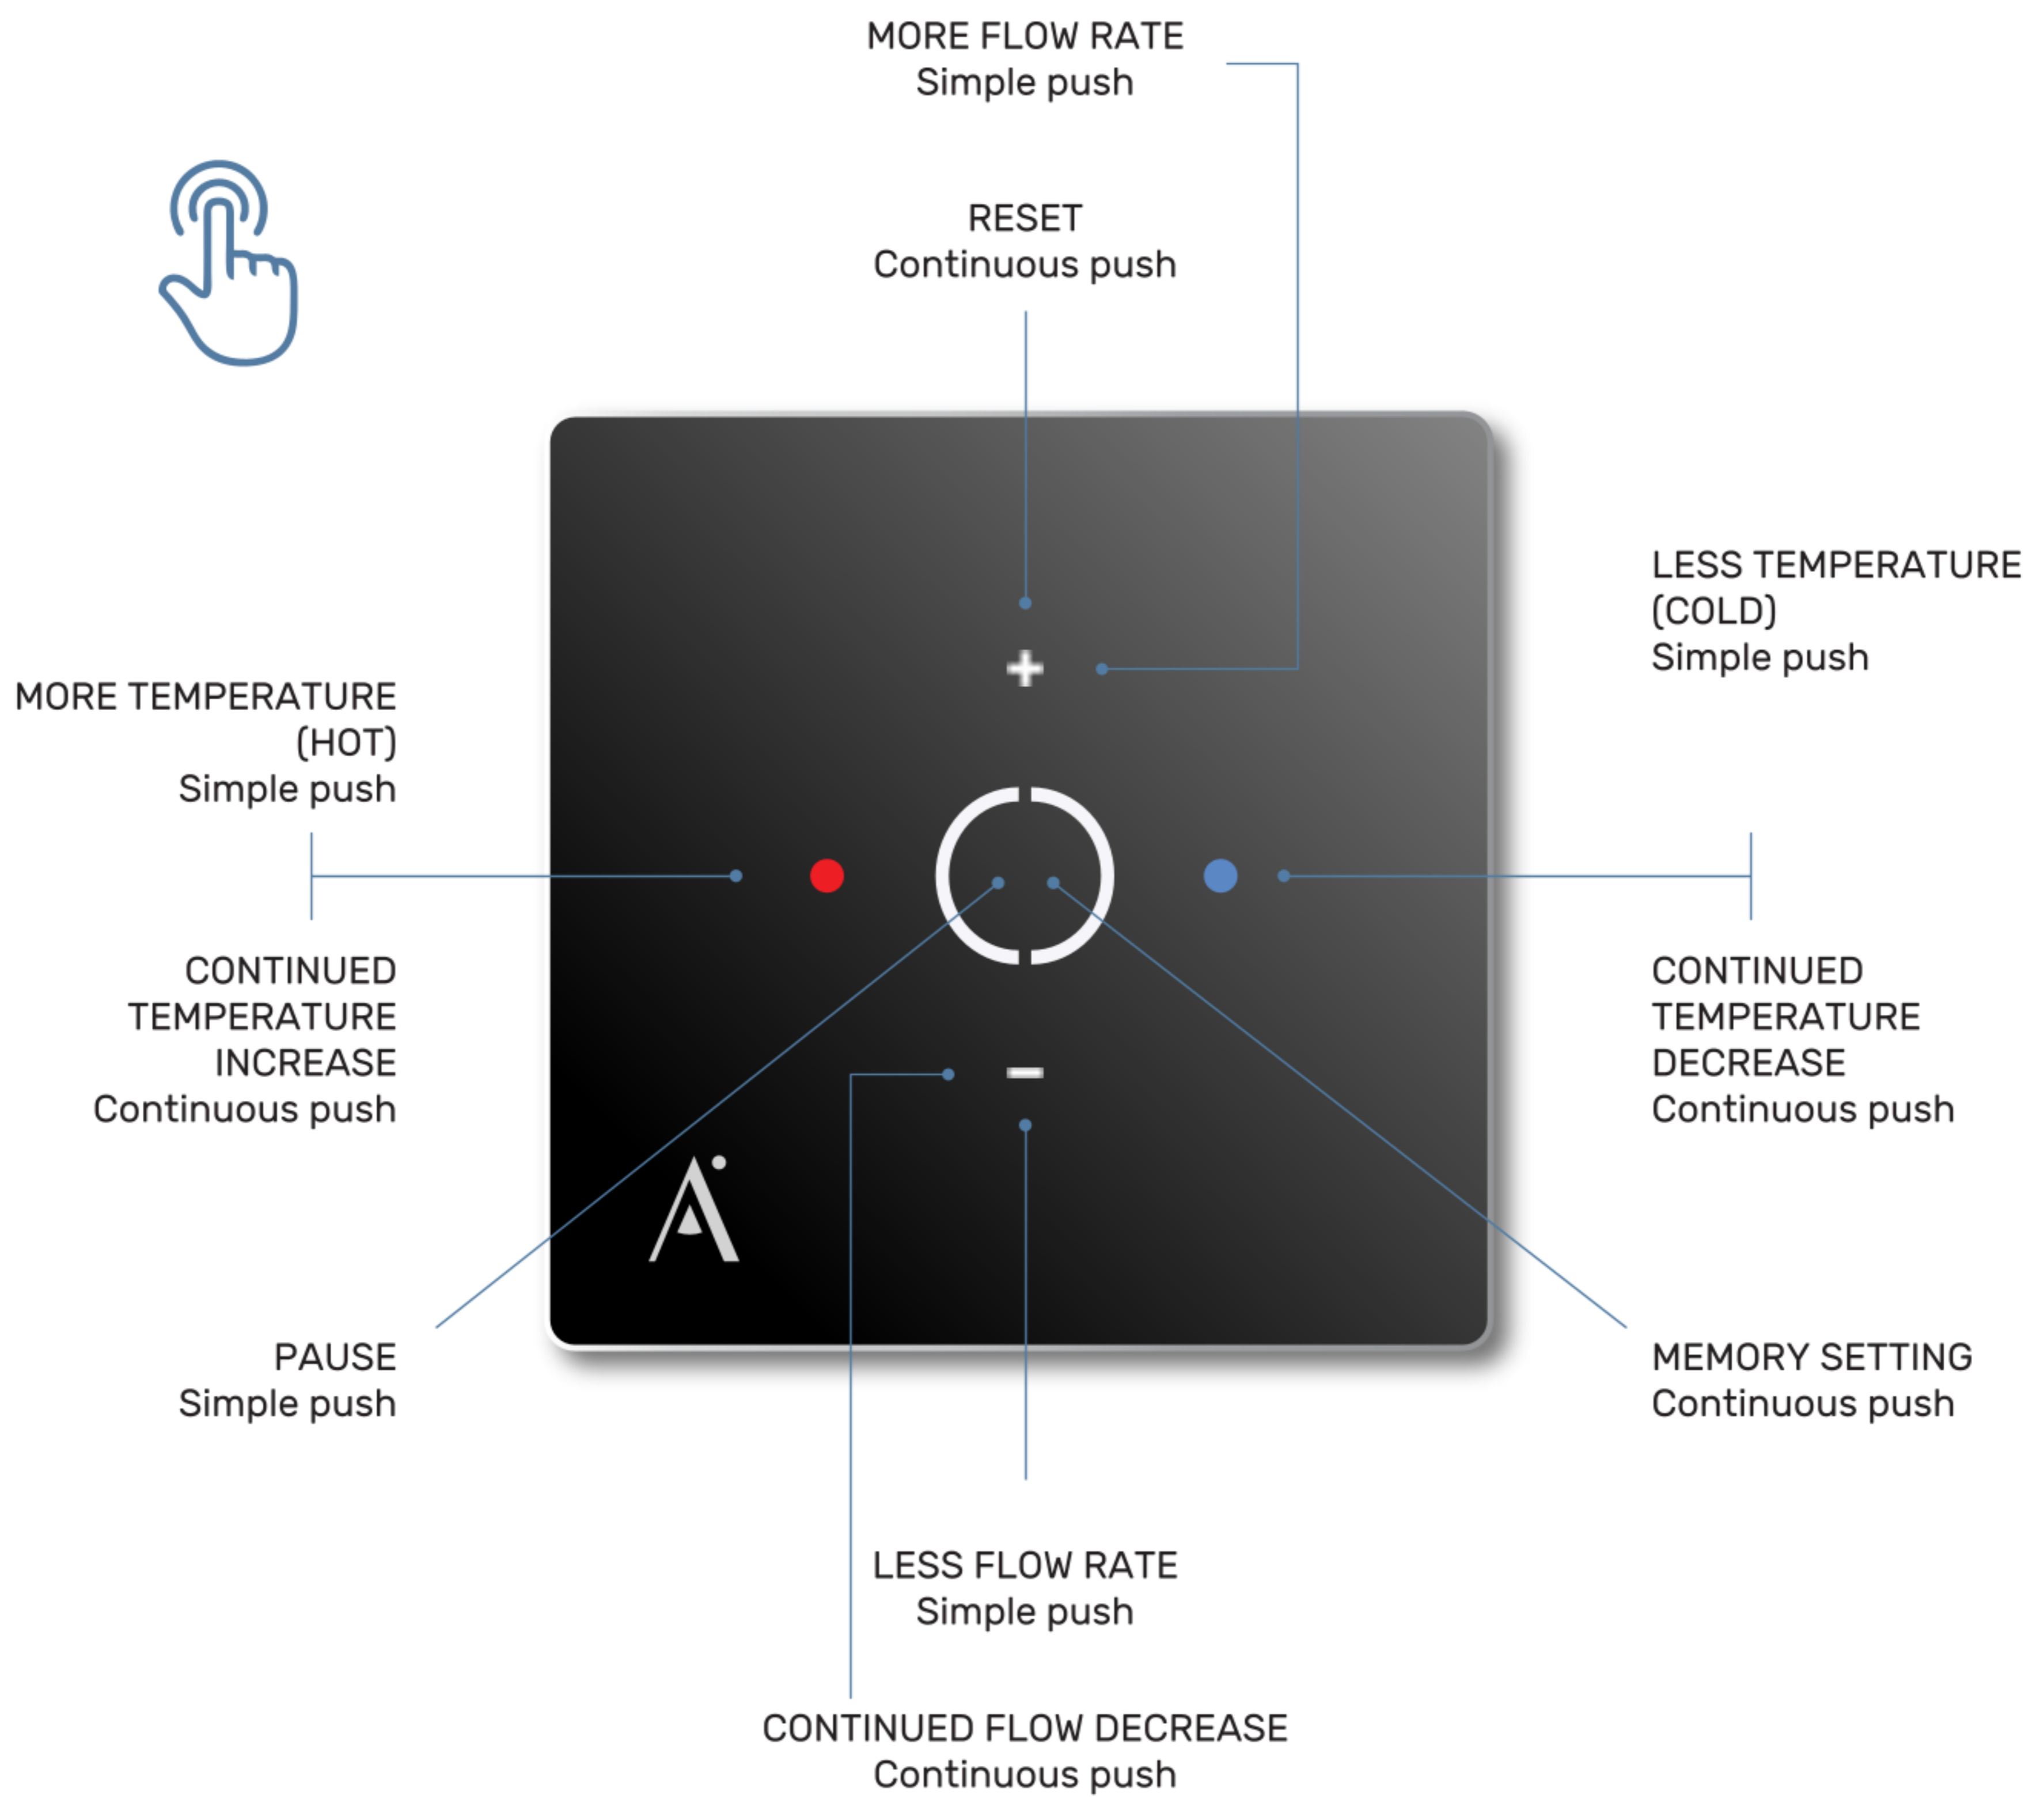

WALL MOUNTED

Free your top with a fully concealed installation.
Really smart.

FREQUENTLY ASKED QUESTIONS

1. Does i-Tap come with battery back-up facility?
Yes, it comes with 10 minutes battery back-up facility in ON MODE and 1.0 Hrs. in standby MODE.
2. How can I memorise the best setup?
First select the desire temp and flow rate then press and hold the play button for 5 seconds.
3. How do I activate the glass filling function?
By pushing and holding the blue button in OFF MODE for 5 seconds .
4. How do I activate the tooth cleaning program?
By pushing and holding the blue button in OFF MODE for 5 seconds.
5. How can I reset the unit to factory settings?
By pushing and holding for 5 seconds the + button in OFF MODE.
6. How do I run the thermal disinfection program?
By pushing and holding the red button in OFF MODE for 5 seconds.
7. How do I activate the Eco flow rate function?
By pushing and holding for 5 seconds the - button in OFF MODE.
8. What is the IP Rating of i-Tap TOUCHPAD?
IP65
9. What is the IP Rating of i-Tap CPU?
IP53
10. Can I install i-Tap TOUCHPAD on a wall ?
Yes you can install i-Tap TOUCHPAD on a wall, but for ease of operation from all age groups we recommend deck mounting.
11. Can i-Tap work on differential pressure?
Yes, i-Tap can work on differential dynamic pressure for hot and cold lines, up to 3.0 bar.
12. What is the minimum and maximum pressure required for i-Tap?
Minimum dynamic pressure: 1.5 bar. Maximum dynamic pressure: 5.0 bar. Recommended dynamic pressure: 3.0 bar.

SMART BATHROOM

13. What is the mixing technology in i-Tap?
i-Tap uses a proportional valve to mix hot and cold water with exact calculation of flow and temperature simultaneously.
- 14.. What is the touchpad technology?
Piezoelectric technology.
15. Is there any rotary part like motor in i-Tap?
No, there are no rotary/frictional parts inside. No motors.
16. What is the operating voltage and maximum load of the system?
i-Tap CPU and touch pad are operating on 12V dc. Maximum load ≤ 15 W and stand-by ≤ 1 W.
17. What is the rated power of this system?
25.0 Watt.
18. What are the hot and cold water range of temperatures required by i-Tap?
Hot water: 48 degree - 65 degree
Cold Water: 05 degree - 28 degree
19. Can i-Tap work on a single water temperature for both cold and hot lines?
Yes.
20. After how many minutes the system will automatically go from Pause to Standby mode?
1.0 minute.
21. After how many minutes the system will automatically go in Standby mode if I forget to close the tap?
10 minutes.
22. When should I perform the thermal disinfection program and what is the duration of that process?
Thermal disinfection is recommended annually to ensure hygiene. This feature flushes hot water for 5 minutes at the maximum temperature available from your water heater.
23. Does i-Tap have an automatic internal clean-up function?
Yes it does. Automatic cleaning ensures perfect hygiene in the system with water-shock flushing to remove lime and impurities from all pipes and outlets.
